

## ➤ Different cassette housing

If cassette recognition is an issue with single cassette, the cassette housing need to be replaced.

There exists a RFID tag in the reverse side of cassette housing. Cassette RFID tag contain RFID information such as cassette identification and size. If Cassette RFID tag is damaged, RFID reader cannot recognize the cassette.

Cassette Label and RFID tag

## ➤ RFID board

If scanner cannot recognize multi cassettes, a RFID board need to be replaced  
Please refer to the FireCR Flash Service manual for RFID board replacement.
